(P1)

ABE.java

package P1;

public class ABE

{

~~public int a = 10;~~

public int a = 10;

protected int b = 20;

private int c = 30;

int d = 40;

}

```
void show()
```

```
{
```

```
    s.o.pln ("Public = " + a);
```

```
    s.o.pln ("Protected = " + b);
```

```
    s.o.pln ("Private = " + c);
```

```
    s.o.pln ("Default = " + d);
```

```
}
```

```
}
```

← Control.java (main) →

```
import P1.*;
```

```
class control
```

```
{
```

```
    public static void main  
        (String  
         args[])
```

```
{
```

```
    ABC ob = new ABC();
```

```
    ob.show();
```

```
}
```

```
}
```

CMD :-

E:\SPSE> Java & Control.Java
